Benchmark Estimating joins the Viewpoint Construction Software Development Partner Program

Sydney, NSW – July 29, 2013 – [Benchmark Estimating](#) and [Viewpoint Construction Software®](#), a market leading project collaboration solution for the construction industry, announced today a partnership that will enable both customer communities the opportunity to take advantage of technology solutions that cover a wide range of the construction lifecycle roadmap.

Viewpoint Construction Software offers a range of solutions that help streamline construction management. The integration between Benchmark Estimating Software and Viewpoint will help users achieve greater productivity and efficiencies, ultimately ensuring their estimates are more accurate and their projects are more profitable.

Robert MacDonald, Director and CEO of Benchmark states, “This new partnership is exciting for us on many levels. We have both been in the industry a long time and it is a natural course for us to solidify our relationship with Viewpoint. By working together we can help our customers across the globe create a holistic approach to projects through improved estimating, progress measurement, and forecasting with improved accuracy.”

Rob Humphreys, vice president product management at Viewpoint goes on to say, “We are pleased to expand our partner program to Australian providers, as we continually look to add value and functionality to customers in all the regions we serve. Our partnership with Benchmark Estimating provides both our customers a commitment to software solutions that focus on helping customers win more jobs by knowing their exact profit margin. We are always looking to partner with companies the caliber of Benchmark, as the commitment to meeting customer needs mirrors our own.”

About Viewpoint Construction Software

Named Oregon's Best Software Company 2012 by TechAmerica, Viewpoint Construction Software has a

long-standing focus on meeting the information needs of construction companies, achieving a leadership position in offering construction-specific enterprise resource planning, as well as point solutions including project and BIM collaboration, mobile field-to-office and enterprise content management. Available as cloud, SaaS, and on-premise solutions, our configurable and scalable products address the unique needs of leading firms throughout the U.S., Canada, the U.K., Europe and Australia.
